LARGE FORMAT PROJECTION SPECIALISTS

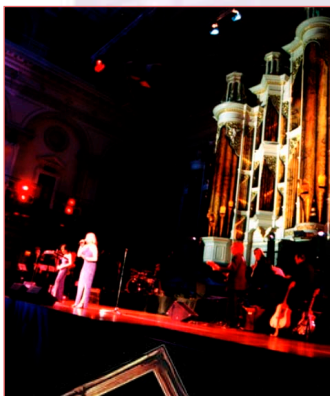

SYDNEY TOWN HALL ORGAN

Custom Light Projections at Sydney Town Hall

Sydney Town Hall is one of Sydney's best loved icons and a popular venue for event organizers. The 8000-pipe Grand Organ is one of the finest examples of its type but many event producers feel the need to hide the organ with drapes or with a backdrop. Like many ornate venues, establishing a particular theme means fighting with or concealing strong architectural or decorative features.

Using high-powered PIGI projectors, The Electric Canvas can transform the organ to suit a desired theme or to support event branding.

The Electric Canvas places a projector upstairs in each of the two side galleries to cover the entire organ. These locations were selected so that they do not limit the use of lighting and other objects that are typically hung on the motorized rigging installed above the stage and auditorium nor do they limit the height at which the chandeliers can be set.

A number of themes and decorative treatments have been used in the past including scrolling and kinetic effects, and these are available to hirers at minimal cost. Custom treatments can be designed by our art department to your brief.

An event may use one or many projected scenes that can be projected on-cue throughout the function. Set up time in venue is typically around two hours. Pricing is available on request.
